

## GREETINGS, I'M MITCH, THE ORGONE DONOR.

I'm on a mission to gift orgonite and bust the HAARP and 5G frequency fence to neutralize the anti-life EMF energy bubble inhibiting all life on Earth. My towerbusting efforts have been centered on Arizona and the SW desert through my *Earth Pipes Across Arizona* project and my continued quest to prove deserts and drought are not natural. My goal is to restore natural weather patterns and the rain cycle, and improve and enhance the overall life-force of our realm.

### THIS IS WHERE YOU COME IN!

- **California is a prime target** for geoengineering activities and the overall climate agenda.
- It's a vital location for humanity, from the simplicity of the food supply to the expansive esoteric and etheric energy web. Orgonite gifting is desperately needed in California, and primarily southern California, a major player in the naturally-flowing jet stream.
- Please use the Orgone towerbuster and earth pipe inside this package, and gift them to your own heart's content in a special location of California in whichever direction you venture from the event. Use these tools to bust some towers and other EMF eye sores of the HAARP/5G frequency fence. Bury the pipe, and gift the towerbuster puck.

To learn more about my California gifting project, Orgone energy, geoengineering, gifting and towerbusting tips and tricks, and utilizing this package to its fullest potential, visit [TheOrgoneDonor.com/california](https://TheOrgoneDonor.com/california) or scan the QR code **HERE ----->**

## WHAT IS A TOWERBUSTER?

The towerbuster (TB) is the universal Orgone tool (aka “orgonite”) used for the process of orgone gifting; in which the TB is distributed within close proximity to EMF-emitting devices such as cell towers, 5G, power plants and substations, smart meters, wifi, and other tower-related and EMF-riddled areas in need of energetic cleansing and EMF mitigation/neutralization. The purpose of Orgone gifting is to destroy the HAARP grid and frequency fence. TBs are versatile, and can be deployed, launched, and left behind by any means in any environment. You **DO NOT** have to bury them. Gift TBs within roughly one-city block of distance to the EMF device or tower in question.

## WHAT IS AN EARTH PIPE?

The earth pipe (EP) is an orgone tool intended to be buried completely below the ground to neutralize harmful EMF and built-up ionization within a geographic location. EPs neutralize energy fields from HAARP towers, relieve geopathic stress, and restructure energy fields that have been compromised by EMF technology and energy weapons. EPs are essentially acupuncture needles to grid positive energy fields into the Earth; including energy grids, vortexes, ley lines, water sources, power- and sub-stations, and other energetically-compromised locations on Planet Earth.

**Earth pipes MUST be completely buried in the ground** to tap into the Earth’s energy grid and function at their fullest potential. Use a hammer, shovel, or power drill to bury them completely below the Earth’s surface, straight downward, like a tent stake (the taped side is the top and the open end is the bottom, which should aim downward into the Earth). EPs are also perfect for towerbusting neighborhoods and creating community-wide positive energy grids. If 5G enters the neighborhood, everyone in the neighborhood should bury an earth pipe on their property space.
