

## WHAT IS ORGONITE

Orgonite is an energy device made from resin, metal shavings, and quartz that produces orgone energy, also known as scalar energy, life force energy, chi, prana, and ether. Based on the research of Dr. Wilhelm Reich, Orgone devices like orgonite generate positive orgone energy along with the piezoelectric charge of quartz. This positive energy cleans stagnant, negative energy and deadly orgone radiation (DOR) from the environment, and transmutes it into a healthy orgone state. DOR is the result of non-native EMF and pollution from geoengineering, cellular phone towers, wifi routers, smart meters, blue tooth devices, and everyday cell phone use.

My orgone devices consist of various catalyzing resins, metal shavings such as aluminum, copper, iron, and brass, and assorted crystals including quartz, selenite, and black tourmaline. Some pieces contain additional elements and crystals, such as atomized metal powders, shungite, precious stones, copper coils, and mica pigment colors. Many of my devices also include terminated quartz points and special coils to aid in scalar wave activity.

## WHERE TO USE ORGONITE

Use orgonite anywhere near EMF sources, such as wifi routers, smart meters, and cell towers. Use it anywhere you would like to neutralize DOR, pump negative ions into the atmosphere (a good thing), transmute negative electromagnetic fields and frequencies, boost positive energy levels, and raise the collective vibration of yourself and your environment.

## WHAT IS A TOWERBUSTER?

The term “**towerbuster**” comes from its ability to neutralize harmful EMF from cell towers and other EMF devices. In the Orgone community, the term “**gifting**” means “to distribute, bury, or strategically hide orgone devices near high EMF sources or places with excess negative energy, in order to return the area to a natural and healthy energetic state.” Orgone workers gift cell towers, power plants, bodies of water, and densely populated areas like schools, concerts, pavilions, and places of worship.
